Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is responsive to applicants' amendment and response received November 24, 2003. Claims 38-80 are currently pending. In view of the cancellation of claims 1-37, all prior art rejections previously relied upon are withdrawn.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 38-80 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frankenbach et al, US 6,491,840.

Frankenbach et al teach wrinkle reducing compositions containing polymers (see abstract). An example of such a composition comprises a silicone polymer comprising carboxylic acid moieties, a polyalkylene oxide polysiloxane, a cyclodextrin, ethanol, a perfume, and the balance water (col. 96, example 46). Suitable additives of the invention include fabric care polysaccharides and antimicrobial preservatives (col. 3, lines 1-38). The compositions of the invention may be used on synthetic fibers such as polyester and nylon, well known in the art as ballistic fabrics (col. 43, lines 54-57). It would have been obvious to one of ordinary skill in the art to prepare a composition according to example 46, further comprising an antimicrobial active and a fabric care polysaccharide, as such

additives are taught as preferred in the compositions of Frankenbach et al. Furthermore, as synthetic fibers such as polyester and nylon are contemplated as treatable with the composition of Frankenbach et al, the examiner maintains the presently claimed method is satisfied.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
